DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a method, system, and computer program product for screening nucleic acids for efficient translation, classified in at least class 702, subclass 20, for example.
- II. Claims 23-37, drawn to a method, system, and computer program product for screening nucleic acids for the presence of coding sequences, classified in class at least class 702, subclass 20, for example.

The inventions are distinct, each from the other because of the following reasons:

The invention of Group I can be shown to be distinct from the invention of Group II as the methods require different starting materials, have different method steps, and have different goals.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, particularly the non-patent literature search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1631

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).
